

## 1. Mudakan Manta Point

Located in Maakandu channel. Best to be dived on incoming current (sometimes very strong!) starting on the eastern corner of the channel. Once inside, the reef features a year round manta point in between 19-25m. its 97% guarantee to dive with these majestic creatures, up to 30 animals have been seen here. With strong currents hold on to something (or use a reef hook) and stay clear of the block. Don't touch or chase mantas. They will come close to you. Very close! If the mantas are not there you will have the pleasure of enjoying the company of many napoleons of all sizes.

### Description

top reef starts from 5m strong currents are expected full with marine life
